Psychological

Cognition · Reasoning · Intelligence · Learning

BRAIN & INTELLIGENCE		
● Left brain dominance	Analytical, logical, convergent thinker. Controls language, planning and organisation.	55.12%
● Linguistics intelligence	Highest multiple intelligence. Strong verbal memory, reading, writing, communication.	13.8%
● Logical / mathematical intelligence	Abstract reasoning, cause-effect thinking, pattern recognition and analytical processing.	13.0%
● Visual-spatial intelligence	Visualization, spatial judgment, 3D recognition and idea formation.	11.6%
● Intrapersonal intelligence	Self-awareness, understanding own strengths and weaknesses, high perfectionism.	12.4%
● Intelligence quotient (IQ)	Reasoning, observation, memory, imagination and problem-solving capacity.	26.8%
LEARNING & PLANNING		
● Auditory learning style	Learns by listening; benefits from discussions, lectures and verbal instruction.	33%
● Visual learning style	Strong visual associations; benefits from charts, diagrams and demonstrations.	27%
● Planning capability	Concept-driven — thinks first then acts. Highly logical and cautious planner.	51.9%
● Acquiring style — self-cognitive	Independent, goal-oriented, target centric, self-starter, confident and inflexible.	80%
BRAIN LOBES — COGNITIVE		
● Frontal lobe	Reasoning, planning, creativity, judgment and parts of speech. Key for academic performance.	20.0%
● Pre-frontal lobe	Execution, cognitive function and personality formation. Controls self-achievement.	18.54%
MANAGEMENT APTITUDE		
● Analytical skills	Strong logical analysis; well-suited for research and data-intensive roles.	Score 9
● Decision-making abilities	Good structured decision-making; tends to struggle when under sudden, unexpected pressure.	Score 9
● Strategic planning	Moderate long-horizon planning; benefits from methodical and structured frameworks.	Score 7
● Critical observation	Good perceptual and detail-spotting ability in structured environments.	Score 7
● Creative approach	Moderate creative thinking; best when creative tasks are grounded in logic.	Score 7

2

Emotional

Feelings · Relationships · Empathy · Social dynamics

EMOTIONAL INTELLIGENCE

- **Emotional quotient (EQ)**
Lowest of all four quotients. Covers managing emotions, interpersonal skills and connecting with self and others. **22.3%**
- **Interpersonal intelligence**
Weakest multiple intelligence. Understanding others' moods, empathy, cooperation and team-based learning. **9.9%**
- **Temporal lobe activity**
Covers hearing, memory, emotion, language and learning. Key centre for emotional processing. **20.49%**
- **Emotions & feelings — neuron**
Right auditory neuron — sensitivity to music, voice, emotional processing and feelings. **10.2%**

PERSONALITY & BEHAVIOUR

- **Dove personality — primary**
People-oriented, loyal, kind-hearted, good listener, great team player and naturally peaceful. **Primary**
- **Eagle personality — secondary**
Goal-oriented, decisive and bold. Emerges under leadership situations or emotional pressure. **Secondary**
- **Affective acquiring style**
Patient, supportive, calm, relationship-oriented; needs motivation and encouragement to act. **10%**
- **Motivation source**
Motivated by cooperation, opportunities to help others and sincere appreciation from peers.

EMOTIONAL SWOT

- **Emotional strengths**
Kind-hearted, gentle, good listener, highly supportive, interactive and naturally team-oriented.
- **Emotional challenges**
Easily affected by environment, possessive-dependent, impulsive and indecisive during crises.
- **Emotional threats**
Caring too much for others may lead to ignoring own needs, losing opportunities and non-risk-taking.

SOCIAL & RELATIONSHIP

- **Communication skill**
Highest management score overall — natural communicator and relationship builder. **Score 11**
- **Teamwork**
Cooperative and collaborative; follows plans well as part of a team but not necessarily alone. **Score 7**
- **RIASEC — social orientation**
Highest latent success score — conveying understanding of others and building personal relationships. **23.55%**
- **Goals — group acceptance**
Motivated by cooperation, sincere appreciation and a strong sense of belonging.
- **HR & marketing suitability**
Department scoring reflects high suitability for people-facing and collaborative roles. **Score 9**

3

Spiritual

Values · Purpose · Inner self · Nature connection

NATURE & OBSERVATION INTELLIGENCE

- **Naturalistic intelligence**
Keen observation of the natural world, affinity for flora and fauna, ability to classify living things. **12.7%**
- **Nature love — neuron**
Visual identification, observation skills and deep nature awareness encoded in neural fingerprint patterns. **WDL level**
- **Affinity to flora & fauna**
Right naturalistic neuron — spatial relations combined with profound affinity for the natural world. **12.7%**
- **Naturalistic hobbies**
High interest in zoos, forests, aquariums; loves reading about animals, plants and astronomy.

INNER SELF & SELF-REFLECTION

- **Intrapersonal intelligence**
Self-reflection, understanding life's purpose, strong values, high will-power and strong self-esteem. **12.4%**
- **Motivation & emotional behaviour**
Deep inner motivation driven by values of loyalty, helping others and maintaining personal security.
- **Core values**
Loyalty, helping others, security, stability, group acceptance and personal accomplishment.
- **Initiative & judgement reasoning**
Inner planning tendency — ponders life's major questions and problems before taking action.
- **Self-esteem**
High self-esteem; understands own value and is able to learn and grow from success and failure.

RESILIENCE & INNER STRENGTH

- **Adversity quotient (AQ)**
Ability to face tough situations, handle challenges and maintain resilience under sustained pressure. **26.4%**
- **Stability orientation**
Seeks controlled, predictable environments; finds inner peace and energy through routine and order.
- **Conflict management**
Best at handling conflict management situations — a natural peacemaker and mediator by inclination.
- **Introspective temperament**
Tends toward solitude for reflection; prefers quiet thinking over impulsive or reactive responses.

MEANING-ORIENTED ACTIVITIES

- **Trekking & outdoor activities**
Score 11 (highest) — nature immersion is a primary source of meaning, energy and restoration. **Score 11**
- **Bird watching & gardening**
Strong affinity — directly connects the spiritual domain with naturalistic intelligence. **Score 9**
- **Diary writing & journalling**
Self-reflection practice — recording thoughts, dreams, goals and processing emotional experiences. **Score 9**
- **Career: counsellor / life coach**
Naturalistic and Intrapersonal alignment suggests deep suitability for meaning-driven human roles.

4

Physical

Body · Movement · Motor skills · Sensory processing

KINESTHETIC & MOTOR INTELLIGENCE

- Bodily-kinesthetic intelligence**
Top physical MI. Movement, hands-on activity, body memory and full muscle coordination. **13.7%**
- Kinesthetic learning — dominant**
Learns best through physical doing, touching, trial-and-error and practical hands-on experience. **40%**
- Gross motor skills**
Body movements, coordination, outdoor activities and sports. Highest tactile neuron score. **12.7%**
- Fine motor skills**
Action identification, hand control, precise finger skills and fine manual movements. **11.7%**
- Sensory integration**
Integration of physical senses for body awareness, balance and physical responsiveness. **6.9%**

BRAIN LOBES — PHYSICAL & SENSORY

- Parietal lobe**
Highest brain lobe score. Governs senses, touch, pain, temperature and language functions. **24.39%**
- Occipital lobe**
Object recognition and vision — supports physical navigation and spatial awareness. **16.59%**

PHYSICAL CREATIVE EXPRESSION

- Musical intelligence**
Rhythm, movement and pitch — bridges physical and creative expression through bodily awareness. **12.9%**
- Creativity quotient (CQ)**
Physical creativity; painting, dance and body-based artistic expression and performance. **24.5%**
- Energy level / drive**
High physical drive and stamina — sustained effort for demanding physical activities. **Score 9**
- Doing capability**
Object-driven model — determined, constructive, hands-on action taker and builder. **48.1%**
- Quality adherence**
High standards for physical tasks — meticulous in hands-on execution and craft. **Score 9**

RECOMMENDED PHYSICAL ACTIVITIES

- Cycling · Trekking · Outdoor games · Aerobics**
All score 11 (highest possible) — perfectly aligned with physical domain strengths. **Score 11**
- Dance · Dramatics**
Physical body expression — connects bodily movement with emotional and musical intelligence. **Score 9**
- Calligraphy**
Fine motor expression — highest score; brings physical precision into artistic form. **Score 11**
- Career: Sports · Medical · Agriculture**
All 4-star feasibility — fields requiring physical skill, bodily intelligence and stamina.

Key insight across all four domains: Gurupriya is most naturally powerful in the **Psychological** and **Physical** domains — she thinks analytically and learns by doing. Her **Spiritual** domain is a quiet but solid strength, grounded in nature, inner values and resilience (AQ 26.4%). The **Emotional** domain is the clear gap — EQ at 22.3% (lowest quotient) and Interpersonal intelligence at just 9.9% (weakest MI) suggest that while she is naturally kind-hearted (Dove personality), she may struggle to manage complex interpersonal dynamics or emotionally charged situations. **Developing EQ is the single highest-leverage growth area across all four domains**, and will unlock the full potential of her strong Psychological and Physical foundations.
