### Physical

InBody composition and ECG normality indicate a healthy physical state. However, Bioresonance physical findings suggest some minor concerns.

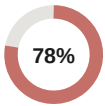

### Emotional

Bio-Well stress index indicates low to moderate stress levels. Nadi vikruti/pulse quality suggests irregularities in emotional balance.

### Psychological

Bio-Well psychology indicators suggest some minor concerns. Nadi stress/overthinking parameters indicate medium stress and overthinking.

### Spiritual

Bio-Well chakra alignment % indicates good energy flow. Energy reserve % suggests a healthy spiritual state.

## Body Systems
